DETAILED ACTION

1. This application is a 371 of PCT/JP00/00233. For applications filed under 371, PCT rules for lack of unity apply.
2. This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept. Under PCT Rule 13.1 the following combinations of claims of different categories are permissible and restriction to one of the following combinations is required.

The Groups are as follows:

- I. Claims 1-4, drawn to a genomic DNA encoding RecQ4 helicase.
- II. Claims 5-6, drawn to a therapeutic agent for Rothmund-Thomson syndrome.
- III. Claim(s) 7, drawn to a diagnostic agent for Rothmund-Thomson syndrome containing an antibody binding to RecQ4 helicase.
- IV. Claims 8-13, drawn to a method for the diagnosis of Rothmund-Thomson syndrome characterized by detecting mutations in the DNA encoding RecQ4.
- V. Claim(s) 14, drawn to a method for the diagnosis of Rothmund-Thomson syndrome comprising detecting proteins binding to an antibody against RecQ4 helicase.

These inventions listed as Groups I-V do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, for example the independent claim 1, is drawn to a genomic DNA encoding RecQ4 helicase, and the claims 5-14 are drawn to a therapeutic agent, a diagnostic agent, a method for diagnosis of Rothmund-Thomson syndrome using a DNA sample and a protein sample. Each of these inventions are independent and the steps in each Group of

inventions are independent to each other and lack a special technical feature that links all the groups together.

Further the prior art in the specification (Nakayama et al. Mol. Gen. Genet. 200, page 266, 1985) based on which the instant claim 1 is anticipated and lack special technical feature.

Accordingly, Groups I-V are not so linked by the same or corresponding technical feature as to form a single general inventive concept.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04.

Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined

claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
